

CLASSIC DETROIT RIVER/LAKE ERIE/LAKE ST CLAIR

REMEMBER WE DO NOT ALLOW PENETRATING CULL SYSTEMS

14 INCH MINIMUM SIZE.

DAY #1 BOAT NUMBERS Due in at 5:30pm

DAY #2 BOAT NUMBERS Due in at 5:00pm

**ST JEANS RAMP USERS MUST BE CHECKED IN 1 HOUR PRIOR TO THESE TIMES
MANDATORY MEETING 10/08 7PM WOODHAVEN BEST WESTERN RESTAURANT.**

ONE TEAM MEMBER MUST BE ATTEND.

THE CHECK-IN Process: We will be looking for late boats only. Be sure to be within the Elizabeth Marina by the quitting time.

ELIZABETH LAUNCH TEAMS MAY WEIGH FROM WATER OR TRAILER YOUR BOAT. You Should Fill Your Bag As Full As Possible With Live Well Water and Proceed To The Weigh-In Area.

DUMP YOUR LIVEWELL WATER IN THE GARBAGE CAN Then Proceed Immediately To The Dip Tank Line And Re-Fill Your Bag, Moving Down The Line Until You've Reached The Bump Master – DUMP YOUR BAG WATER AND HAND HIM THE BAG WITH YOUR FISH. YOU WILL DISPOSE OF YOUR OWN DEAD FISH. ONLY A LIVE FISH CAN BE WEIGHED FOR BIG BASS.

SPECIAL INSTRUCTIONS – FISH CARE

1. Consider using the foam pool noodles cut up into appropriate widths that match the surface area of your livewell. They will cushion the fish from rough water runs etc. We also have a drain plug in our boat to insert into our livewell overflow opening when making our trip in so we can fill our livewells closer to the lid. Remember you will have to switch your livewell to recirculate when it is full or your boat will fill up water. Please be on recirculate in the bay so not to pump warmer bay water into your well.
2. Use livewell treatments, kosher salt is fine for this purpose as it is what's used by most DNR's. Commercial additives are fine as well but salts cheap. NEVER use more than the recommended concentration, too much of a good thing isn't. If using kosher salt (non-iodized salt) a maximum 5% by volume solution is best, of course you'll need to know the capacity of your livewell which is easily determine by pre-filling with a 5-gallon bucket and noting same on the underside of your lid/s. If you have a oxygenator you can only use certain additives. G Juice is most commonly used.
3. Ideally, you'll leave your livewell aerator run constantly when you've reached your boat limit or at least set the minimum off time with timed aerators.
4. On runs longer than 20 minutes, take time to stop and refresh your wells with new water before proceeding on.
5. Learn how to "fizz your catch", instructions are on the website. Fish in distress are those that cannot maintain equilibrium and float on their side while in the livewell. Your other option is: Fin Clips. Designed as an alternative to fizzing, the Fin Clips gently attach to the anal and pelvic fins of fish to keep them upright, allowing their swim bladder to deflate naturally.
6. If you bring us a bunch of beat up, finned, or bleeding fish you can take them home. We will not weigh them your catch will be disqualified. You have more than enough time with our fishing hours that you will not need to run hard and not stop periodically to check on your fish.
7. Don't forget ice or frozen bottles for your livewell especially if utilizing the St Jean ramp option.

FREDERICKTOWN OH

ADVANCED MARINE PERFORMANCE™

SPECIAL INSTRUCTIONS – LAKE ERIE CLASSIC

8. A Rig regulations from Canada and Michigan are different so we will impose a limit of 4 baits with hooks and the rest must be dummy baits.

9. Teams choosing to utilize the St Jean launch site will take off at same starting time as the rest of the competitors.

10. St Jean teams must be on the trailer and ready to leave St Jean for Elizabeth Ramp 1 hour before the end of tournament hours. There is no exception if you are late dump your fish. This is the chance you take by using this option.

11. If you use the St Jean ramp to launch then you use the St Jean ramp to check in. If you do not check in at the St Jean ramp your catch will be disqualified. Jeff Kauth will be rampmaster.

12. There is a possibility that you may have to pay a launch fee at Elizabeth Ramp too when you arrive to weigh your fish. It is out of my control and that too is the price you may pay using this option. Do not argue with the attendant if they do indeed charge you.

13. Please watch the weather for this event. Practice accordingly to projected wind directions and conditions. We all have our favorite areas and spots if we get higher winds, they may not be fishable. If we see that a certain body of water will be dangerous or small craft advisory's we will put it off limits OR cancel that day and go to a wind date.

14. Do not put yourself in a situation where you cancel your room and we cancel the tournament that morning. If the weather looks bad make sure you have a place to stay. There will be no refunds for any reason at the classic. Please get your entry in using pay pal option asap if possible. Next year we will have a deadline for payment with no exceptions.

15. Elizabeth ramp area from the start of the seawall to the bridge will be off limits to fishing.
